### PROFESSIONAL SUMMARY

I'm a Full-Stack Developer (Frontend heavy), focused on React and modern web tooling. I love turning complex ideas into smooth, accessible user experiences. Experienced with React.js, React Native (Expo), Next.js, TanStack Query, Zustand, and Tailwind. I write clean, maintainable code and enjoy working with designers and backend engineers to ship production features that make real impact. Open to remote roles and comfortable collaborating across time zones.

### TECHNICAL SKILLS

- **Frontend:** React, Next.js, React Native, Tailwind CSS, Shadcn UI, Framer Motion, GSAP, Three.js
- **State & Data:** TanStack Query, Zustand, React Context, Redux
- **Validation & Auth:** Zod, React Hook Form, Clerk Auth, JWT, Better-Auth
- **Backend / DB:** Node.js, Express, Firebase, MongoDB, Prisma, Drizzle, PostgreSQL
- **Tools:** Git/GitHub, Vercel, Docker, Postman, Figma
- **Practices:** SSR/ISR, code-splitting, lazy loading, caching strategies, accessibility, performance optimization.

### SELECTED EXPERIENCE

#### LYNOG TECH NIG — Frontend Developer • Feb 2023 – Present.

- Built and maintained scalable admin dashboards used by internal teams and clients to manage product and user data efficiently
- Implemented role-based access control (RBAC) and secure workflows for user and product management.
- Mentored junior team members, improving issue resolution speed and overall code quality
- Leveraged SSR/ISR to improve first-load performance and SEO on key pages.
- Collaborated with designers to translate Figma into pixel-perfect, responsive UIs, improving UI consistency and reducing layout regressions.
- Focused on bundle size reduction, caching strategies, and measurable UX improvements.

#### Freelance Web Developer • Dec 2021 – Present.

- Delivered multiple production websites and web apps for small businesses and startups.
- Built e-commerce features, payment flows, and mobile-friendly components, integrated third-party APIs and optimized performance.
- Managed project deadlines and client communication end-to-end.

### PROJECT HIGHLIGHTS

- **Miala Admin Dashboard** — [LINK](#)  
React, TypeScript, Tailwind, Redux. Built a role-based admin system for super and regular admins, integrated APIs for product and user management, and developed a Progressive Web App (PWA) version for cross-device accessibility. Designed and deployed a functional e-commerce landing page prototype used for compliance validation.
- **Vortex Car Rental Marketplace** — [LINK](#)  
Next.js and TypeScript full-stack platform that connects car owners and renters through verified listings. Built user and merchant dashboards with secure authentication, listing management, and booking workflows. Focused on trust, usability, and performance across merchant and customer workflows.
- **Bitwire Trust** — [LINK](#)  
A complete crypto fintech web app built with React and TypeScript. Users can purchase electricity, airtime, and data using cryptocurrency, with an integrated admin dashboard for transaction management.
- **Mobile App (React Native + Expo)** —  
Built an AI powered expense tracker and summary with custom theming, Clerk authentication, Neon database, and Express backend. Designed real-time API integration and cross-platform UX for seamless user experience.

### EDUCATION

B.Sc. Computer Science — ISCOM (Institut Supérieur de Communication, d'Organisation et de Management)
