TORU T GABRIEL

Frontend Developer

Lagos, Nigeria • +234 704 419 5454 • dayotoru@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer specializing in React and modern frontend tooling. Hands-on experience building and deploying responsive, accessible, and performant web applications using React, Next.js, Vite, TanStack Query, Zod, Clerk Auth, Tailwind CSS, and Firebase. Passionate about translating complex problems into simple, usable interfaces and continuously improving development practices.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, Tailwind CSS, Shadcn UI, Framer Motion, GSAP, Three.js
State & Data: TanStack Query, Zustand, React Context, Redux
Validation & Auth: Zod, React Hook Form, Clerk Auth, JWT, Better-auth patterns
Backend / DB: Node.js, Express, Firebase, MongoDB, Prisma, Drizzle, PostgreSQL
Tools: Git/GitHub, Vercel, Docker, Postman, Figma
Practices: SSR/ISR, code-splitting, lazy loading, caching strategies, accessibility, performance optimization.

SELECTED EXPERIENCE

LYNOG TECH NIG — Frontend Developer • Mar 2025 – Present.

- Built and maintained scalable admin dashboards used by internal teams and clients to manage product and user data efficiently
- Implemented role-based access control (RBAC) and secure workflows for user and product management.
- Mentored junior team members, improving issue resolution speed and overall code quality
- Leveraged SSR/ISR to improve first-load performance and SEO on key pages.
- Collaborated with designers to translate Figma into pixel-perfect, responsive UIs, improving UI consistency and reducing layout regressions.
- Focused on bundle size reduction, caching strategies, and measurable UX improvements.

Freelance Web Developer • Apr 2023 – Present.

- Delivered multiple production websites and web apps for small businesses and startups.
- Built e-commerce features, payment flows, and mobile-friendly components, integrated third-party APIs and optimized performance.
- Managed project deadlines and client communication end-to-end.

PROJECT HIGHLIGHTS

- **Miala Admin Dashboard** — React, TypeScript, Tailwind, Redux. Built a role-based admin system for super and regular admins, integrated APIs for product and user management. Designed and deployed a functional e-commerce landing page prototype used for compliance validation and stakeholder demo
- **Vortex Car Rental Marketplace** — Next.js and TypeScript platform that connects car owners and renters through verified listings. Built user and merchant dashboards with secure authentication, listing management, and booking workflows. Focused on trust, usability, and performance across merchant and customer workflows.
- **Bitwire Trust** — A complete crypto fintech web app built with React and TypeScript. Users can purchase electricity, airtime, and data using cryptocurrency, with an integrated admin dashboard for transaction management.
- **Mobile App (React Native + Expo)** — Built an expense tracker with custom theming, Clerk authentication, Neon database, and Express backend. Designed real-time API integration and cross-platform UX for seamless user experience.

EDUCATION

B.Sc. Computer Science — ISCOM (Institut Supérieur de Communication, d'Organisation et de Management)

ADDITIONAL INFORMATION

Open to remote frontend roles, flexible with time zones and collaborative, cross-functional teams. Strong communicator, experienced working with designers and backend engineers to deliver production features.
