- Project Management
- Time Management
- Teamwork
- Effective Communication
- Critical Thinking
- Adaptability and Flexibility
- Self Motivation
- Problem solving

## LANGUAGES

- English (Fluent)
- French (Basics)

## PROFILE SUMMARY

Developer with a strong front-end background learning to go full-stack, with a passion for building clean, modern web apps. I enjoy solving problems, picking up new tech fast, and working both solo and with teams. Currently improving my backend skills to round out my stack and grow into a more versatile developer.

## WORK EXPERIENCE

### LYNOG TECH NIG — Frontend Developer
MAR, 2025 - PRESENT

- Developed a robust admin dashboard using React and JavaScript, enabling staff to manage products, agents, and user roles with improved efficiency.
- Designed and implemented role-based access control (RBAC) to support both admin and super admin workflows.
- Currently building a fintech application with TypeScript, applying reusable components, type safety, and API integration.
- Collaborating with backend developers and designers to deliver scalable, maintainable features in a fast-paced team environment.

### Freelance Web Developer
APRIL, 2023 - PRESENT

- Built responsive websites and full-stack apps using React, Node.js, and MongoDB.
- Delivered tailored solutions by collaborating closely with clients on requirements and goals.
- Integrated e-commerce features and optimized performance for speed and scalability.
- Maintained and debugged codebases, ensuring functionality and reliability across devices.
- Managed multiple projects independently, demonstrating strong time and client management.

## EDUCATION

B.Sc. Computer Science     SEPT 2019 - AUG 2022
ISCOM (Institut Supérieur de Communication, d'Organisation et de Management)
